                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               probable ATP-dependent DNA helicase - Mycobacterium tuberculosis (strain H37RV)
C;Species: Mycobacterium tuberculosis
C;Dacies: Mycobacterium tuberculosis
C;Daces: Mycobacterium tuberculosis

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Pypothetical protein asr4522 [imported] - Nostoc sp. (strain PCC 7120)
C;Species: Nostoc sp.
A:Note: Nostoc sp.
A:Note: Nostoc sp. strain PCC 7120 is a synonym of Anabaena sp. strain PCC 7120
C;Date: 14-Dec-2001 #sequence_revision 14-Dec-2001 #text_change 30-Jun-2002
C;Accession: AB2371

polyphenolic adhesive protein 3A precursor - Mediterranean mussel
N.Alternate names: foot protein 3A
(Species: Mytlius galloprovincialis (Mediterranean mussel)
U.Alternate names: foot protein 3A
(Spates: Mytlius galloprovincialis (Mediterranean mussel)
C.Bate: 23-Uul-1997 #sequence_revision 29-Aug-1997 #text_change 04-Feb-2000
C.Accession: S68954

A.Title: Cloning, sequencing and sites of expression of genes for the hydroxyarginine
A.Reference number: S68954; MulD:96305382; PMID:8706704
A.Molecule type: mRNA
A.Residues: 1-70 < INO>
F.1-24.Domahin: signal sequence #status predicted <SIG>
F.1-24.Domahin: signal sequence #status predicted <AMT>
F.25-70/Product: polyphenolic adhesive protein 3A #status predicted <AMT>
F.27.28,32,38,43,46,50,53,69,70/Modified site: 3',4'-dihydroxyphenylalanine (Tyr) #st
F.36,37,45,48,49,62,64,67/Modified site: 4-hydroxyarginine (Arg) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Probable membrane protein STV4565 [imported] - Salmonella enterica subsp. enterica seriovar Typhi
G;Species: Salmonella enterica subsp. enterica serovar Typhi
A;Note: this species has also been called Salmonella typhi
C;Date: 09-Nov-2001 #sequence_revision text_change 09-Nov-2001

hypothetical protein EEED8.12 - Caenorhabditis elegans
C; Species: Caenorhabditis elegans
C; Accession: T15923
R; Chissoe, S.
Spublitch to the EMBL Data Library, July 1995
A; Description: The sequence of C. elegans cosmid EEED8.
A; Reference number: 218428
A; Accession: T15923
A; Residuas: preliminary; translated from GB/EMBL/DDBJ
A; Molecule type: DNA
A; Molecule type: DNA
A; Residuas: 1-197 < CHI>A; Residuas: 1-197 < CHI>A; Cross-references: EMBL:U23484; NID:9733597; PID:9733609; PIDN:AAC46772.1; CESP:EEEC
A; Experimental source: strain Bristol N2
C; Genetics:

Nighternate names: tetradecancyl phorbol acetate-induced protein 11
C;Species: Wis musculus (house mouse)
C;Date: 28-Feb-1990 #sequence_revision 28-Feb-1990 #text_change 19-Apr-2002
C;Date: 28-Feb-1990 #sequence_revision 28-Feb-1990 #text_change 19-Apr-2002
C;Accession: 504743
R;Varnum, B.C.; Lim, R.W.; Sukhatme, V.P.; Herschman, H.R.

-! FUNCTION: REQUIRED FOR STABILITY OF PEX5 AND PROTEIN IMPORT INTO THE PEROXISOME MATRIX.

-! SUBCELLULAR LOCATION: Cytoplasmic (Probable).

-! SUBCELLULAR LOCATION: Cytoplasmic (Probable).

-! DISEASE: DEFECTS IN PEX1 ARE THE CAUSE OF PEROXISOME BIOGENESIS DISEASE: GRADE OF PEROXISOME BY DEFECTS IN PEX1 ARE THE CAUSE OF INFOXISOME ASSEMBLY. NEONATAL ADRENOLEUKODYSTROPHY (NALD) IS ONE OF THE PBD LINKED TO DEFECTS IN PEX1.

-! DISEASE: DEFECTS IN PEX1 ARE THE CAUSE OF INFAMILE REFSUM DISEASE.

-! SIMILARITY: BELONGS TO THE AAA FAMILX OF ATPASES.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         "Primary structure of the triple block RNA genes of the Plantago asiatica mosaic virus.";
Dok!, Akad. wauk SSR 328:625-628(1993).
-!- FUNCTION: RNA-replication. The central part of this protein possibly functions as an APP-binding helicase.
-!- CATALYTIC ACTIVITY: N nucleoside triphosphate - N diphosphate
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Solovyev A.G., Novikov V.K., Merits A., Savenkov E.I., Zelenina D.A., Tyulkina L.G., Morozov S.Y.; "Genome characterization and taxonomy of Plantago aslatica mosaic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     01.NOV-1995 (Rel. 32, Created)

Hum. Retroviruses 4:165-173(1988).
-!- FUNCTION: REV APPEARS TO ACT POST-TANNSCRIPTIONALLY TO RELIEVE NEGATIVE REPRESSION OF GAG AND ENV PRODUCTION.
-!- SUBCELLULAR LOCATION: Nuclear; accumulates in the nucleoli.
-!- PTM: PHOSPHOPROTEIN WHOSE STATE OF PHOSPHOPRATATION IS MEDIATED BY A SPECIFIC SERIEME KINASE ACTIVITY PRESENT IN THE NUCLEUS.
-!- MISCELLANEOUS: THE Z-84 ISOLATE WAS TAKEN FROM A 54 YEAR-OLD
                                                                                                                                                                                                                                                                                                     Yourno J., Josephs S.F., Reitz M.S. R. Complete genome sequence of an aerobic thermoacidophilic

Tenarchaeon, Sulfolobus tokodaii strain?";

L. DNA Res. S. 13-140(2001).

C.-I- FUNCTION: Catalyzes the reaction of cyanate with bicarbonate to

produce ammonia and carbon dioxide (By similarity).

C. -I- CATALTIC ACTIVITY: Cyanate (NCO(-)) + H(2)O = carbamate (H(2)N-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   0972W5;

-!- FUNCTION: MAY CONSTITUTE A GLUTATHIONINE PEROXIDASE-LIKE PROFECTIVE SYSTEM AGAINST OXIDATIVE STRESSES.
-!- CATALYTIC ACTIVITY: 2 glutathione + H(2)O(2) = oxidized glutathione + 2 H(2)O.
-!- SIMILARITY: BELONGS TO THE GLUTATHIONE PEROXIDASE FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Length 167;

-!-FUNCTION: MAY CONSTITUTE A GLUTARHIONINE PEROXIDASE-LIKE
PROTECTIVE SYSTEM AGAINST OXIDATIVE STRESSES.
-!-CATALYTIC ACTIVITY: 2 glutathione + H(2)0(2) = oxidized
glutathione + 2 H(2)0.
-!-SIMILARITY: BELONGS TO THE GLUTATHIONE PEROXIDASE FAMILY.
                                                                                                                                                                                                                                                                          SEQUENCE FROM N.A.
